DETAILED ACTION

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Futamura, U.S. Paten 6,162,894.

The Futamura patent discloses the claimed method of treating the same materials comprising the steps of contacting the halogen-containing flame-retardant resin with tetralin (see examples in columns 5-6). The tetralin disclosed by the Futamura patent reads upon both the dehalogenation promoting material and a dehalogenation material (see present claims 3, 5 and 8). The patent further discloses the treatment of similar materials (see col. 2, lines 17-67). The grinding of the pelleted resin with the tetralin would read upon the kneading of the mixture while applying shear force of claim 6. The Futamura patent discloses the removal of oxygen before the treatment (see col. 5, lines 5-25). The treatment of chips of personal computers would provide the limitation to

separate the metal from the resin, since the treatment would dissolve the resin (see col. 2, lines 50-55).

Therefore, since the Futamura patent discloses each and every limitation, the claims are anticipated.
